

ERROLLA SUBHAKARA

Senior Engineering Lead

PROFILE SUMMARY

Frontend Developer - Angular with 9 years of overall experience in designing and developing scalable, high-performance web applications. Expertise in HTML, CSS, JavaScript, and Bootstrap with hands-on experience across the full software development lifecycle. Possess 7 years of solid experience in Angular, building dynamic, responsive, and user-friendly applications using modern frameworks and best practices. Strong knowledge of reusable components, directives, pipes, services, and state management. Experienced in working with RESTful APIs, HTTP interceptors, lazy loading, and performance optimization techniques. Proven ability to deliver clean, maintainable, and efficient code with a focus on user experience and application performance. Adept at collaborating with cross-functional teams in Agile environments.

WORK EXPERIENCE

Senior Engineering Lead

Persistent Systems

04-2022 - 04-2026

1. Develop and maintain Single Page Applications (SPA) using Angular 16/18 versions.
2. Build reusable, modular, and maintainable components using Angular architecture and best practices.
3. Implement data binding, directives, services, pipes, and dependency injection.
4. Work extensively with TypeScript, JavaScript (ES6+), HTML5, and CSS3.
5. Integrate frontend applications with RESTful APIs and backend services.
6. Implement advanced Angular features such as lazy loading, route guards, and reactive forms.
7. Use RxJS for reactive programming and

PROJECTS

Patron Player Web Portal

18 Months

Description

Patron Player Web Portal is modernization application that maintains casino player information in TV (Table View). A Player can login into application and see his player card, Tier status where all his played games status in the form of levels and the offers useful to add money to wallet.

Responsibilities

- Involved in the developing UI screens/components of dashboard, login screen update, transaction history, transaction investigation and limits.
- Involved in the integration of Angular material and Font-Awesome icons in the application since it started from the scratch.
- Created custom components, pipes, directives and configuration files for the project.
- Involved in the RESTful APIs calling and integrating the data with Angular components.
- * Developed microservices for player module using Spring Boot architecture.

Unified Wallet

30 Months

- Developed responsive UI screens using HTML, CSS, Bootstrap, JavaScript, and Angular

asynchronous data handling.

8. Optimize application performance through efficient change detection and code optimization techniques.

9. Collaborate with UI/UX designers, backend developers, and product teams in an Agile development environment.

10. Conduct code reviews, debugging, and troubleshooting to ensure code quality and maintainability.

11. Mentor junior developers and contribute to technical design discussions.

12. Build rest APIs using Spring Boot and Microservices.

ACE Software Developer

Appiness Interactive

05-2021 - 04-2022

1. Develop and maintain Single Page Applications (SPA) using Angular 12 version.

2. Build reusable, modular, and maintainable components using Angular architecture and best practices.

3. Implement data binding, directives, services, pipes, and dependency injection.

4. Work extensively with TypeScript, JavaScript (ES6+), HTML5, and CSS3.

5. Integrate frontend applications with RESTful APIs and backend services.

6. Implement advanced Angular features such as lazy loading, route guards, and reactive forms.

7. Use RxJS for reactive programming and asynchronous data handling.

8. Optimize application performance through efficient change detection and code optimization techniques.

9. Collaborate with UI/UX designers, backend developers, and product teams in an Agile development environment.

Software Engineer

JMR Infotech

01-2019 - 05-2021

1. Develop and maintain Single Page Applications (SPA) using Angular 9 version.

2. Build reusable, modular, and maintainable components using Angular architecture and best practices.

3. Implement data binding, directives, services,

framework, enhancing user experience and interface consistency.

- Integrated RESTful APIs through Angular services to enable seamless data communication between front-end and back-end systems.

- Deployed Angular applications on production servers, ensuring smooth release cycles and optimal application performance.

- Contributed to Single Sign-On (SSO) platform development, facilitating secure identity management and streamlined access across multiple enterprise applications.

Image and Video Editing Tool

11 Months

Description

The Image & Video Editing Tool is used to create custom images and videos. Apply multiple filters on newly generated images and videos. Image & Video list page where newly generated items shown in and details link where it has complete information about single image or video.

Responsibilities

- Mostly worked on the defects which were assigned to me from DTS portal.
- Implemented dynamic components, directives, pipes and utilities for the images or videos.
- Handled RESTful API calls to generate new images and videos.

GDB (Genie De Banca)

26 Months

Description

GDB customer portal is an E-Commerce application which provides purchasing electronics, automobiles, real estate properties, holiday packages and gift cards.

It has product list page where customer can choose the product to purchase and sorting options available. Customers can add the products into cart using Add to Cart option and checkout the product to buy it.

Responsibilities

- Involved in the development process of GDB from the scratch.
- Participated in sprint planning, Tasking and Estimation of the assigned work.
- Developed re-usable components and services.
- Implemented RESTful API calls.

Single-Sign-On (SSO)

pipes, and dependency injection.

4. Work extensively with TypeScript, JavaScript (ES6+), HTML5, and CSS3.

5. Integrate frontend applications with RESTful APIs and backend services.

6. Use RxJS for reactive programming and asynchronous data handling.

7. Collaborate with UI/UX designers, backend developers, and product teams in an Agile development environment.

Software Engineer

Postero Technologies

05-2018 - 12-2018

- Developed the scalable and reactive web pages using HTML, CSS, JavaScript and Angular

Software Developer

Hirarky Solutions Pvt Ltd

01-2017 - 01-2018

1. Proficient knowledge of JavaScript, JQuery, CSS, HTML, AJAX.

2. Good experience in developing web page quickly and effectively using jQuery, HTML5, CSS3, Responsive Web Design, Bootstrap and experience in making web pages cross browser compatible.

EDUCATION

B.Tech/B.E. - Computer Science and Engineering (CSE)

2015

Sreenivasa Institute of Technology and Management Studies, Chittoor

Grade - 7/10

Class XII

2011

Andhra Pradesh, English

8 Months

Description

Single Sign-On offers total identity management software, it has services and audit controls that transform how an enterprise operates. It's a platform where we can operate multiple applications with single username and password.

Responsibilities

- Developed UI screens using HTML, CSS, Bootstrap, JavaScript and Angular Framework.
- Involved in the APIs integration from Angular services.
- Involved in the deploying of angular application in servers.

OpEzee

13 Months

Description

OpEzee has founded with a vision to become the one-stop shop for innovative technology solutions to cater the diverse needs of the Indian Infrastructure Industry. The company has a portfolio of product solutions and services that helps clients to do their business better. OpEzee was conceptualized with a vast amount of experience in working with strategic and challenging players in the Indian infrastructure industry.

Responsibilities

- Execute user interface designs from product requirements to UI components.
- Developed UI screens or components using HTML, CSS and JavaScript.
- Involved in the creating components, services and directives from Angular CLI.
