Fresher Development & Project Readiness

Objective Owner:

Swapna Reniguntla, .

WHAT is the target about:

Threshold:

- Successfully onboard freshers and deliver foundational technology training.
- Conduct pre- and post-training assessments and maintain milestone tracking.
- Achieve $\geq 70\%$ fresher competency readiness through structured learning and assessments.
- Ensure completion of planned milestone projects and case-study evaluations.
- Training freshers to Digital Port business processes, workflows, and project fundamentals.

Target:

- Improve project readiness through milestone-based learning, mentoring, and structured assessments.
- Achieve $\geq 85\%$ competency readiness and project preparedness through structured learning, mentoring, and assessments.
- Provide personalized coaching to address learning gaps and improve performance.
- Collaborate with Project Managers to evaluate milestone projects and incorporate feedback into training plans.
- Enhance Digital Port domain understanding through case studies, project simulations, and knowledge-sharing sessions.

Stretch:

- Enable $\geq 95\%$ fresher competency readiness through structured learning paths, assessments, and coaching initiatives.
- Establish a scalable fresher development and competency framework.
- Develop project-ready resources capable of contributing with minimal supervision.
- Improve Digital Port domain readiness through advanced domain-focused learning, assessments, and practical project-based exercises.

Status:	Pending approval
Start date:	01/01/2026
Target date:	31/12/2026
KRA:	Portfolio

HOW the Target can be achieved:

Threshold: - Design and execute a structured onboarding program covering organizational processes, coding standards, quality practices, and foundational technologies. - Conduct pre-training assessments to evaluate the initial technical competency of freshers and identify learning gaps. - Prepare milestone-based learning plans with clear objectives, assignments, case studies, and project exercises. - Deliver foundational technology training on the required technology stack and Digital Port/domain fundamentals. - Conduct regular milestone reviews and post-training assessments to measure learning progress. - Maintain training records, assessment results, and milestone tracking reports for each fresher. - Provide mentoring, coaching, and feedback to address learning gaps and improve technical competency. - Collaborate with Project Managers and senior team members to review milestone projects and incorporate feedback into training activities. Monitor competency progress and ensure freshers achieve $\geq 70\%$ competency readiness through structured learning and assessments.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Target: - Conduct project readiness assessments to identify skill gaps and define competency requirements. - Implement milestone-based learning plans with structured training, hands-on exercises, mentoring, and project simulations. - Monitor learner progress through periodic assessments, mock interviews, and competency tracking to ensure $\geq 85\%$ readiness. - Provide personalized coaching, targeted improvement plans, and continuous feedback to address learning gaps and enhance performance.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Stretch: - Design and implement structured learning paths with defined milestones, competency benchmarks, and assessment criteria. - Conduct advanced technical training, hands-on workshops, coding assignments, mini-projects, and capstone projects aligned with business and project requirements. - Implement periodic assessments, project simulations, and readiness evaluations to measure competency growth and identify improvement areas. - Provide targeted mentoring, coaching, and personalized development plans to accelerate fresher learning and project readiness. - Deliver Digital Port domain training through case studies, business process walkthroughs, practical exercises, and project-based learning. - Track competency readiness, assessment results, project evaluations, and learner feedback through dashboards and continuously improve training effectiveness.

Start date:

01/01/2026

Target date:

31/12/2026

People Development, Mentoring & Engagement

Objective Owner:

Swapna Reniguntla, .

WHAT is the target about:

Threshold:

- Foster effective communication and collaboration during training programs.
- Provide timely feedback, guidance, and support to trainees.
- Mentor freshers and employees on technical skills, coding standards, and organizational practices.
- Participate in employee engagement activities and support learning and collaboration initiatives.
- Maintain Digital Port domain learning materials, assessments, and training records.
- Track participation and learning outcomes for domain-related training programs.

Target:

- Improve employee competency through regular knowledge-sharing, mentoring, and coaching initiatives.
- Collaborate with Project Managers, stakeholders, and SMEs to identify skill gaps and development needs.
- Support targeted upskilling programs aligned with business and project requirements.
- Promote continuous learning through technical coaching, mentoring, and knowledge-sharing initiatives.
- Strengthen Digital Port domain readiness through structured learning paths, assessments, and knowledge-sharing activities.
- Analyze assessment results and feedback to identify domain competency gaps and improvement opportunities.
- Collaborate with stakeholders to align domain training content with project requirements.

Stretch:

- Establish a structured mentoring approach for freshers and junior employees.
 - Drive knowledge-sharing initiatives across teams and technology areas.
 - Enhance employee competency through targeted upskilling initiatives aligned with business requirements.
 - Strengthen organizational capability and workforce readiness through mentoring, coaching, and competency development initiatives.
 - Improve Digital Port domain competency and workforce readiness through structured measurement, assessment, and continuous improvement initiatives.
 - Continuously enhance domain training content based on project feedback, business requirements, and assessment outcomes.
- Recommend process improvements to strengthen Digital Port domain knowledge and
- workforce readiness.

Status:	Pending approval
Start date:	01/01/2026
Target date:	31/12/2026
KRA:	People

HOW the Target can be achieved:

Threshold: - Conduct regular mentoring sessions for freshers and employees on coding standards, development best practices, quality guidelines, and organizational expectations. - Support learners in resolving technical challenges and addressing competency gaps through coaching and guidance. - Share project experiences, technical best practices, and lessons learned during training and mentoring sessions. - Collaborate with Project Managers, SMEs, and team members to provide relevant technical and domain guidance. - Participate in employee engagement activities and support learning, collaboration, and knowledge-sharing initiatives across teams. - Encourage continuous learning and professional development through mentoring and technical discussions.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Target: - Conduct regular knowledge-sharing sessions, technical workshops, and mentoring programs to enhance employee competency and project readiness. - Partner with Project Managers, SMEs, and stakeholders to identify skill gaps, competency requirements, and project-specific learning needs. - Design and deliver targeted upskilling programs aligned with business priorities, project demands, and emerging technologies. - Provide technical coaching, personalized learning plans, and continuous mentoring to support employee growth and career development. - Track learning progress through assessments, feedback, competency evaluations, and development plans to measure improvement. - Foster a continuous learning culture through communities of practice, technical forums, knowledge repositories, and peer-learning initiatives.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Stretch: - Design and implement a structured mentoring program with defined learning goals, milestones, and competency development plans for freshers and junior employees. - Conduct regular knowledge-sharing sessions, technical forums, workshops, and cross-team learning initiatives to promote knowledge transfer. - Collaborate with Project Managers, SMEs, and stakeholders to identify skill gaps and deliver targeted upskilling programs aligned with business and project needs. - Provide coaching, mentoring, and career development guidance to improve employee competency, project readiness, and domain knowledge. - Support workforce readiness through competency-based learning paths, practical assignments, and readiness assessments. - Track mentoring effectiveness, learning progress, assessment outcomes, and competency improvement through periodic reviews and performance dashboards."

Start date:

01/01/2026

Target date:

31/12/2026

Technical Training, Competency Development & Workforce Readiness

Objective Owner:

Swapna Reniguntla, .

WHAT is the target about:**Threshold:**

- Conduct technology competency training programs aligned with business and project needs.
- Maintain training content for key technology stacks and ensure training records are updated to track employee and fresher competency progress.
- Adapt training content and delivery methods to changing business requirements and learning environments.
- Deliver training on $\geq 70\%$ of planned technology competencies required for business and project needs.
- Achieve an average training feedback score of ≥ 3.75 .

Target:

- Deliver structured learning paths, competency assessments, and milestone-based training programs.
- Expand training coverage across Angular, Spring Boot, Cloud, AI/GenAI, PSA technologies, and other strategic technology stacks.
- Conduct training programs covering $\geq 80\%$ of planned technology competencies, project-specific skills, and strategic technology areas.
- Support project demands through targeted upskilling initiatives and emerging technology enablement.
- Improve employee competency and project readiness through continuous learning and assessment-driven development.

Stretch:

- Enable organizational readiness for emerging technologies through specialized training programs and strategic upskilling initiatives.
- Conduct training programs covering $\geq 90\%$ of planned technology competencies, including project-specific skills and strategic technology areas.
- Launch specialized training tracks aligned with AI/GenAI, Cloud, PSA technologies, and future business needs.
- Improve competency assessment scores and project readiness across teams through structured learning and assessments.
- Build sustainable technical capability through competency-based learning paths, practical assignments, and readiness assessments.
- Proactively identify future skill requirements and align training programs with organizational growth and business needs.
- Improve workforce readiness and business capability through strategic upskilling initiatives aligned with future project requirements, organizational goals, and PSA initiatives.

Status:	Pending approval
Start date:	01/01/2026
Target date:	31/12/2026
KRA:	Financial

HOW the Target can be achieved:

Threshold: - Prepare a quarterly technology training plan aligned with business, project, and PSA requirements. - Identify required technology competencies through discussions with Project Managers, Delivery Teams, and competency assessments. - Develop and update training materials, hands-on exercises, case studies, and assessment questionnaires for key technology stacks. - Conduct scheduled training sessions on technologies such as Angular, Spring Boot, Cloud, AI/GenAI, PSA technologies, and project-specific skills. - Maintain training records, attendance, assessment results, and feedback reports to track employee and fresher competency progress. - Review learner feedback after each session and update content, examples, and delivery methods based on identified improvement areas. - Adapt training schedules, learning paths, and delivery approaches to support changing project priorities and business requirements. - Track planned versus completed technology training coverage and ensure training is delivered for at least 70% of planned technology competencies. - Monitor training feedback scores and continuously improve content and delivery to maintain an average feedback score of ≥ 3.75 .

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Target: - Develop structured learning paths for Angular, Spring Boot, Cloud, AI/GenAI, PSA technologies, and other project-relevant technology stacks. - Conduct competency assessments to identify skill gaps and create targeted learning plans. - Design milestone-based training programs with hands-on exercises, case studies, coding assignments, and practical assessments. - Coordinate with Project Managers and Delivery Teams to identify project-specific skill requirements and prioritize training needs. - Expand training coverage by introducing new technology modules and updating existing content based on business and project demands. - Conduct targeted upskilling sessions to address immediate project requirements and resource readiness needs. - Monitor technology competency coverage against the annual training plan and ensure at least 80% of planned technology competencies are covered. - Track assessment results and learner progress to identify improvement areas and provide focused coaching. - Continuously enhance training content and delivery methods based on learner feedback, assessment outcomes, and emerging technology trends. - Support employee readiness for project assignments through competency-based learning and practical exercises.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Stretch: - Create structured learning paths and milestone assessments to evaluate technical competency development. - Conduct structured training programs covering technology fundamentals, coding standards, quality practices, and project-specific skills. - Assign coding exercises, case studies, mini-projects, and milestone projects to evaluate practical understanding. - Conduct periodic assessments after each milestone to measure learning progress and competency improvement. - Analyze assessment results to identify individual learning gaps and areas requiring additional support. - Provide one-on-one mentoring and personalized coaching sessions for freshers who require additional guidance. - Collaborate with Project Managers and technical reviewers to evaluate milestone projects and obtain constructive feedback. - Incorporate project review feedback into subsequent training milestones and learning activities. - Track fresher competency readiness through assessment scores, project evaluations, and milestone completion status. - Conduct domain-focused sessions and practical exercises to improve Digital Port domain understanding and project readiness.

Start date:

01/01/2026

Target date:

31/12/2026

Training Effectiveness, Process Excellence & Stakeholder Collaboration

Objective Owner:

Swapna Reniguntla, .

WHAT is the target about:

Threshold:

- Maintain training schedules, records, assessment reports, and learning materials.
- Improve training effectiveness through regular evaluation and learning outcome analysis.
- Support HR in preparing and executing training calendars.
- Ensure training completion, assessment, and feedback records are maintained and reported.
- Support Digital Port domain knowledge sharing and learning initiatives for freshers and employees.
- Encourage employees to participate in Digital Port domain awareness sessions.

Target:

- Improve training effectiveness through competency assessment frameworks and continuous learning improvement initiatives.
- Leverage learner feedback and assessment outcomes to enhance competency development and training impact.
- Maintain reusable learning assets, knowledge repositories, and assessment dashboards.
- Collaborate with Project Managers and stakeholders to align training plans with project and business requirements.
- Conduct Digital Port domain knowledge-sharing sessions and mentoring activities.
- Collaborate with SMEs and Project Managers to identify domain learning needs and readiness gaps.
- Support employee competency development in Digital Port business processes and workflows.

Stretch:

- Implement data-driven training improvement processes and measure training impact.
- Standardize learning paths, assessments, and project readiness metrics across the organization.
- Develop a scalable competency management framework aligned with future business needs.
- Proactively recommend process improvements based on training effectiveness, assessment trends, stakeholder feedback, and learning outcomes.
- Analyze domain assessment results and recommend improvements to strengthen Digital Port domain readiness.

Status:	Pending approval
Start date:	01/01/2026
Target date:	31/12/2026
KRA:	Process

HOW the Target can be achieved:

Threshold: - Prepare and maintain annual, quarterly, and monthly training calendars in coordination with HR and business stakeholders. - Maintain updated training records, attendance details, assessment reports, feedback reports, and learning materials in a centralized repository. - Conduct pre-training and post-training assessments to measure learning effectiveness and competency improvement. - Collect and analyze training feedback after each session to identify improvement opportunities. - Generate periodic training status reports and dashboards to track training completion, assessments, and learner progress. - Coordinate with HR to schedule training programs, communicate training plans, and ensure smooth execution. - Maintain assessment, feedback, and learning outcome records for all planned training programs. - Support Digital Port domain knowledge initiatives by maintaining domain learning materials, assessments, and knowledge-sharing resources. - Track Digital Port domain learning progress and document competency outcomes for reporting and continuous improvement.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Target : - Define and implement training effectiveness metrics, competency assessment criteria, and learning outcome measurement standards. - Conduct pre-training and post-training assessments to evaluate knowledge improvement and competency development. - Analyze learner feedback, assessment results, and training performance reports to identify gaps and implement improvement actions. - Develop and maintain centralized repositories for learning materials, assessment questionnaires, training recordings, and knowledge assets. - Create and maintain dashboards to track training effectiveness, competency progress, assessment scores, and learner engagement. - Collaborate regularly with Project Managers, SMEs, and stakeholders to align training priorities with business and project requirements.

Start date:

01/01/2026

Target date:

31/12/2026

HOW the Target can be achieved:

Stretch: - Establish training effectiveness metrics, competency benchmarks, and dashboards to monitor learning outcomes, competency readiness, and training impact. - Standardize learning paths, assessment frameworks, readiness criteria, and evaluation processes across training programs and fresher development initiatives. - Develop and maintain a scalable competency management framework aligned with current and future business, project, and technology requirements. - Conduct periodic analysis of assessment results, training effectiveness data, stakeholder feedback, and learning trends to identify improvement opportunities. - Collaborate with Project Managers, Delivery Teams, HR, and business stakeholders to align competency development initiatives with organizational goals and workforce planning. - Drive continuous process improvement by implementing data-driven recommendations, best practices, and measurable actions to enhance training effectiveness, competency readiness, and project preparedness.

Start date:

01/01/2026

Target date:

31/12/2026
