

# DEEPAK KUMAR

+91 9108374117      deepak.kumar121th@gmail.com

## CORE COMPETENCIES

- Java Development
- Spring Boot Microservices
- RESTful API Development
- JPA & Hibernate ORM
- MySQL Database Management
- UI/UX Component Design
- Responsive Web Design
- Cloud Integration & API Consumption
- Problem Solving & Debugging

## EDUCATION

- Bachelor's in Electronics & Communication Engineering -VTU, 2017

## SOFT SKILLS

## PERSONAL DETAILS

**Date of Birth:** 04<sup>th</sup> August 1992  
**Language Known:** English, Hindi  
**Address:** Bangalore, India

## WORK EXPERIENCE

**Mphasis Technologies, Bangalore - Sr. Software Engineer | BFSI Domain | Apr'2022 – Present**

### Key Result Areas:

- Designed and implemented Spring Boot applications and microservices, enabling efficient backend operations and robust business logic execution for BFSI solutions.
- Architected and deployed CI/CD pipelines using Jenkins and GitLab, streamlining release cycles, reducing deployment errors, and accelerating feature delivery.
- Developed interactive and dynamic UI components using Angular 17+, React.js, TypeScript, RxJS, HTML5, and CSS3, significantly improving customer engagement and usability.
- Led Angular version migration and project upgrades, ensuring compatibility with latest frameworks and reducing technical debt across multiple modules.

**Technology – driven professional with diverse experience in Software Engineering, focusing on Full-stack Development across various industries, including BFSI and Healthcare. Seeking to leverage expertise in a senior leadership role within the Technology sector, particularly in innovative software solutions.**

## PROFILE SUMMARY

- Accomplished Software Engineer** with nearly 7 years of expertise in designing & developing scalable enterprise applications across BFSI, Healthcare, & Insurance domains.
- Proficient in building modern, responsive,** and dynamic UI components using Angular (2-17+), React.js, TypeScript, RxJS, JavaScript, HTML5, CSS3, and Bootstrap.
- Strong back-end proficiency** in Core Java, Java 8, Spring Boot Microservices, RESTful APIs, JPA, and MySQL, enabling full-stack solution delivery.
- Skilled at designing and integrating** CI/CD pipelines using Jenkins and GitLab CI/CD to ensure seamless deployment and accelerated release cycles.
- Hands-on experience in migrating and upgrading** Angular applications across multiple versions with focus on performance optimization and user experience.
- Skilled in code quality assurance and maintainability** through SonarQube, unit testing (Jasmine/Karma), and peer code reviews.
- Expertise in cloud data integration** and secure API consumption, ensuring data confidentiality and compliance within regulated industries.
- Established ability to collaborate** with cross-functional teams, translating business requirements into robust technical solutions.

## TECHNICAL SKILLS

- Technologies Used: HTML5, CSS3, JavaScript, Ajax , Core Java, JPA, Maven, Docker, SonarQube
- Framework: Angular 17+, NgRx, Bootstrap, Jasmin, Spring Boot
- Library: RxJS
- Database: MySQL
- Workflow Tools: NPM, Webpack, Git, Git Lab, Jira, Bitbucket, Visual Studio, Atom
- Test Runner: Karma
- Automation Server: Jenkins, CI/CD

- ❖ Troubleshoot and resolved complex production-level issues and bugs, enhancing system reliability and minimizing downtime for critical banking applications.
- ❖ Built feature-rich forms with validations, typeahead, and multi-input fields, improving operational efficiency and enabling seamless task management for end users.

**Capgemini Technologies & Services - Consultant | Healthcare & Insurance Domain | Apr'2021 – Mar'2022**

**Key Result Areas:**

- ❖ Developed and integrated RESTful APIs to securely fetch and store sensitive patient data from cloud systems into MySQL databases, ensuring compliance with healthcare regulations.
- ❖ Enhanced backend logic and data processing using Java 8, Spring Boot, and JPA, improving application performance and scalability.
- ❖ Collaborated with clients to analyze requirements, validate workflows, and implement custom validation rules, ensuring the application met precise business needs.
- ❖ Conducted bug fixing and code maintenance, improving system stability and reducing errors in production-critical environments.
- ❖ Authored detailed technical documentation covering issue resolution, API workflows, and enhancement steps for smoother knowledge transfer.
- ❖ Participated in Agile/Scrum ceremonies, contributing to sprint planning, daily stand-ups, and iterative delivery to meet project deadlines efficiently.

**KPISoft Technologies Pvt. Ltd., Bangalore -Product Engineer | BFSI Domain | Sep'2018 – Jan'2021**

**Key Result Areas:**

- ❖ Designed and implemented responsive UI components using Angular (2, 7, 8, 9), JavaScript, HTML5, and CSS3, enhancing the user experience for financial applications.
  - ❖ Developed and maintained RESTful APIs and backend services with Core Java, Spring Boot, and MySQL, ensuring seamless integration and high-performance data handling.
  - ❖ Implemented client-side and server-side validation frameworks, improving data accuracy, reliability, and compliance with industry standards.
  - ❖ Coordinated with backend teams to verify API payloads and expected outputs, ensuring error-free integration and smooth application functionality.
  - ❖ Executed manual testing and functional validation of application features, contributing to quality assurance and reducing production defects.
  - ❖ Enhanced existing product features and resolved bugs, improving usability and customer satisfaction while supporting the application lifecycle from development to deployment.
-
