Nearest Hospital	
Manipal Hospital Varthur	

△ LOW RISK

Your response places you in the Lower risk category.

Your Kidney Performance Review indicates that your current kidney health is *meeting expectations*.

Based on your responses, you currently show **low risk indicators** for kidney disease.

This suggests that:

- You may not have major risk factors at present.
- Your lifestyle and health indicators appear stable.
- Preventive monitoring is still important.

Kidney disease often develops silently, so regular screening remains essential even if your risk is low.

Use your kidney screening voucher to stay ahead of potential risks.
